Computer Engineering

Section 4

Elements of Quantum Mechanics

4.1 Classical Systems

- » Particles
- » Propagating Waves
- » Standing Waves
- » Chromatography

4.2 Strange Experimental Results => The Advent of Quantum Mechanics

- » Black Body Radiation
- » Discrete Optical Spectra
- » Photoelectric Effect
- » Particle-Wave Duality

- => light emission is quantized
- => light emission/absorption quantized – Bohr Atom
- => light is described by particles

4.3 Why do we need quantum mechanics?

$$p = hf / c$$

$$= h / \lambda \quad (\text{because } c = \lambda f)$$

$$= \hbar k \quad (\text{because } k = 2\pi / \lambda)$$

4.4 Formulation of Schrödinger's Eq.

Section 4 Elements of Quantum Mechanics

Why do we need Quantum Mechanics?

$$I = G \times V$$

$$= q \times n \times v \times A$$

↑ charge density
 ↑ density
 ↑ velocity
 area

$$n \neq \rho \times N$$

Number of electrons available for conduction

Number of atoms/volume from crystal structure

Number of electrons/atoms

II	III	IV	V	VI
4 Be	5 B	6 C	7 N	8 O
12 Mg	13 Al	14 Si	15 P	16 S
30 Zn	31 Ga	32 Ge	33 As	34 Se
48 Cd	49 In	50 Sn	51 Sb	52 Te
80 Hg	81 Tl	82 Pb	83 Bi	84 Po

- All electrons may be created equally, but they appear do not behave identically!

Do I really need Quantum Mechanics ?

If it were large objects, like a skier skiing past a set of obstacles, Newton's mechanics would work fine, but in a micro-world

- Some electrons are closely bound to the atomic cores
- Some electrons are loosely bound
=> they can move through the structure freely
- Even free electrons need empty states to flow into
=> not only the states, but their filling is important!

Carrier Density

Carrier number = Number of states x filling factor

↑ ↑
Chapters 2-3 Chapter 4

Total number of occupants
= Number of apartments
X The fraction occupied

- Given chemical composition and atomic arrangements, we can compute electron density by using quantum mechanics.
- We discussed the origin of quantum mechanics - experiments were inconsistent with the classical theory.
- We saw how Schrödinger equation can arise as a consequence of quantization and relativity, but this is not a derivation.

- We will solve some toy problems in the next section to get a feeling of how to use quantum mechanics.
