

HUGE IMPLICATIONS FROM TINY INNOVATIONS

Kind Greetings,

We, at Nanotech Impex India Pvt. Ltd., invite you to **Nanotech India 2009**. This is your opportunity to come and see the future of technological innovation as it is being applied today. Nanotechnology is providing increasingly prolific economic advantages across a spectrum of industries as its commercialization proliferates and product introductions into the marketplace expand.

Companies from across the globe are utilizing Nanotechnology to enhance current product offerings as well as create new, novel and unique products. Eliciting multi-functional properties from common materials, addressing plaguing environmental problems and breakthroughs in medical treatments are all a reality due to the wonders of Nanotechnology. In order to introduce business leaders to the opportunities and value added benefits of integrating Nanotechnology and Nanomaterials into their product offering, we present, **Nanotech India 2009**.

The program will be oriented toward the international business community and include lectures, exhibitions and networking functions, your inclusion at which can be customized according to your interests. The Conference itself will be held at the magnificent new Gokulam Park Convention Center in Cochin, Kerala. The Schedule of the three day Conference will highlight; Nanoengineering and Materials on the 14th, Environmental Nanotechnology on the 15th, and Medical Nanotechnology and Allied Products on the 16th. Above all we want you to not only see but be a part of the emerging Nanotechnology Economy.

INVISIBLE CONTRIBUTIONS SHAPING VISIBLE SOLUTIONS CREATING THE FUTURE ATOM BY ATOM
