**Week 7 Quiz ANSWERS: PN Junction Electrostatics and Ideal Diode Equation**

**ECE 305: Semiconductor Devices**

Mark Lundstrom, Purdue University, Spring 2015

Answer the **multiple choice questions** below by choosing the **one, best answer**.

- 1) Which of the following is the Poisson equation for the depleted N-side of a PN junction?
  - a)  $dV/dx = +qN_D/(K_S\epsilon_0)$ .
  - b)  $dV/dx = -qN_D/(K_S\epsilon_0)$ .
  - c)  $dV/dx = 0$ .
  - d)  $d\mathcal{E}/dx = +qN_D/(K_S\epsilon_0)$ .**
  - e)  $d\mathcal{E}/dx = -qN_D/(K_S\epsilon_0)$ .
  
- 2) Which of the following statements about a one-sided PN junction  $N_D \gg N_A$  is true?
  - a) The peak electric field in the depletion region varies as  $\sqrt{V_{bi}}$  and  $\sqrt{N_A}$ .**
  - b) The peak electric field in the depletion region varies as  $1/\sqrt{V_{bi}}$  and  $\sqrt{N_A}$ .
  - c) The peak electric field in the depletion region varies as  $\sqrt{V_{bi}}$  and  $1/\sqrt{N_A}$ .
  - d) The peak electric field in the depletion region varies as  $1/\sqrt{V_{bi}}$  and  $1/\sqrt{N_A}$ .
  - e) The peak electric field in the depletion region varies as  $V_{bi}$  and  $\sqrt{N_A}$ .
  
- 3) Which of the following statements about a one-sided PN junction  $N_D \gg N_A$  is true?
  - a) The depletion region width varies as  $\sqrt{V_{bi}}$  and  $\sqrt{N_A}$ .
  - b) The depletion region width varies as  $1/\sqrt{V_{bi}}$  and  $\sqrt{N_A}$ .
  - c) The depletion region width varies as  $\sqrt{V_{bi}}$  and  $1/\sqrt{N_A}$ .**
  - d) The depletion region width varies as  $1/\sqrt{V_{bi}}$  and  $1/\sqrt{N_A}$ .
  - e) The depletion region width varies as  $V_{bi}$  and  $\sqrt{N_A}$ .
  
- 4) What is the physical meaning of the area under  $\mathcal{E}(x)$  vs.  $x$ ?
  - a) It is the total doping density in the transition region.
  - b) It is equal to the bandgap of the semiconductor.
  - c) It is the net space-charge density in the transition region.
  - d) It is the net dipole moment of the junction.
  - e) It is the built-in potential of the junction.**

- 5) Which of the following is true about the energy barrier that keeps electrons on the N-side and holes on the P-side?
- It increases under forward bias and decreases under reverse bias.
  - It increases under forward bias and increases under reverse bias.
  - It decreases under forward bias and decreases under reverse bias.
  - It decreases under forward bias and increases under reverse bias.**
  - It decreases under forward bias and does not change under reverse bias.
- 6) What is the mathematical statement of the “law of the junction”?
- $np = n_i^2$ .
  - $np = n_i^2 e^{qV_A/k_B T}$ .**
  - $np = n_i^2 e^{qV_A/2k_B T}$ .
  - $np = n_i^2 e^{qV_{bi}/k_B T}$ .
  - $np = n_i^2 e^{qV_{bi}/2k_B T}$ .
- 7) For an ideal diode, the **forward bias** ( $V_A > 0$ ) current is proportional to  $e^{qV_A/nk_B T}$ . What is the value of  $n$  for an ideal diode?
- $n = 0$ .
  - $n = 0.5$ .
  - $n = 1.0$ .**
  - $n = 1.5$ .
  - $n = 2.0$ .
- 8) For an ideal diode, the **reverse bias** ( $V_A < 0$ ) current is proportional to what?
- $-V_A$ .
  - $\sqrt{-V_A}$ .
  - $(-V_A)^{1/3}$ .
  - $(-V_A)^2$ .
  - $(-V_A)^0$ . \*\*\*i.e. the current is independent of voltage in reverse bias**
