Nov. 7, 2017

Class participation: You can help me make this course better by identifying good references for each of the 15 weeks, good papers that can illustrate the applications of methods covered in class, etc. By providing me with one, good, relevant reference for the course, you will receive 25 participation points (out of 500 total points).

Send me a few sentence description of the content item - what it is about and why it is relevant to 656. If I approve, I will ask you to post it on Piazza, and you will receive credit).

Last possible date to submit is Friday, Dec. 8 at 5:00 PM. You must have my approval in advance – and that week is very busy for me.

Mini-Project: A good way to learn the material, is to do a project. The work must be yours and yours alone. You will write a report of **no more** than 20 pages (space and one-half) including figures but not including references. You will be graded on technical accuracy, but also on the organization, clarity, and quality of the writing.

See class web page for instructions – **I will accept projects until 5:00 PM on Friday, Dec. 8.**
