Why Nanotechnology?

- **Miniaturization**
 - ⊕ Less material, faster
- **Novel Properties**
 - ⊕ Quantum phenomena
- **Bring Different Disciplines Together**
 - ⊕ Engineering, Physics, Chemistry, Biology,...

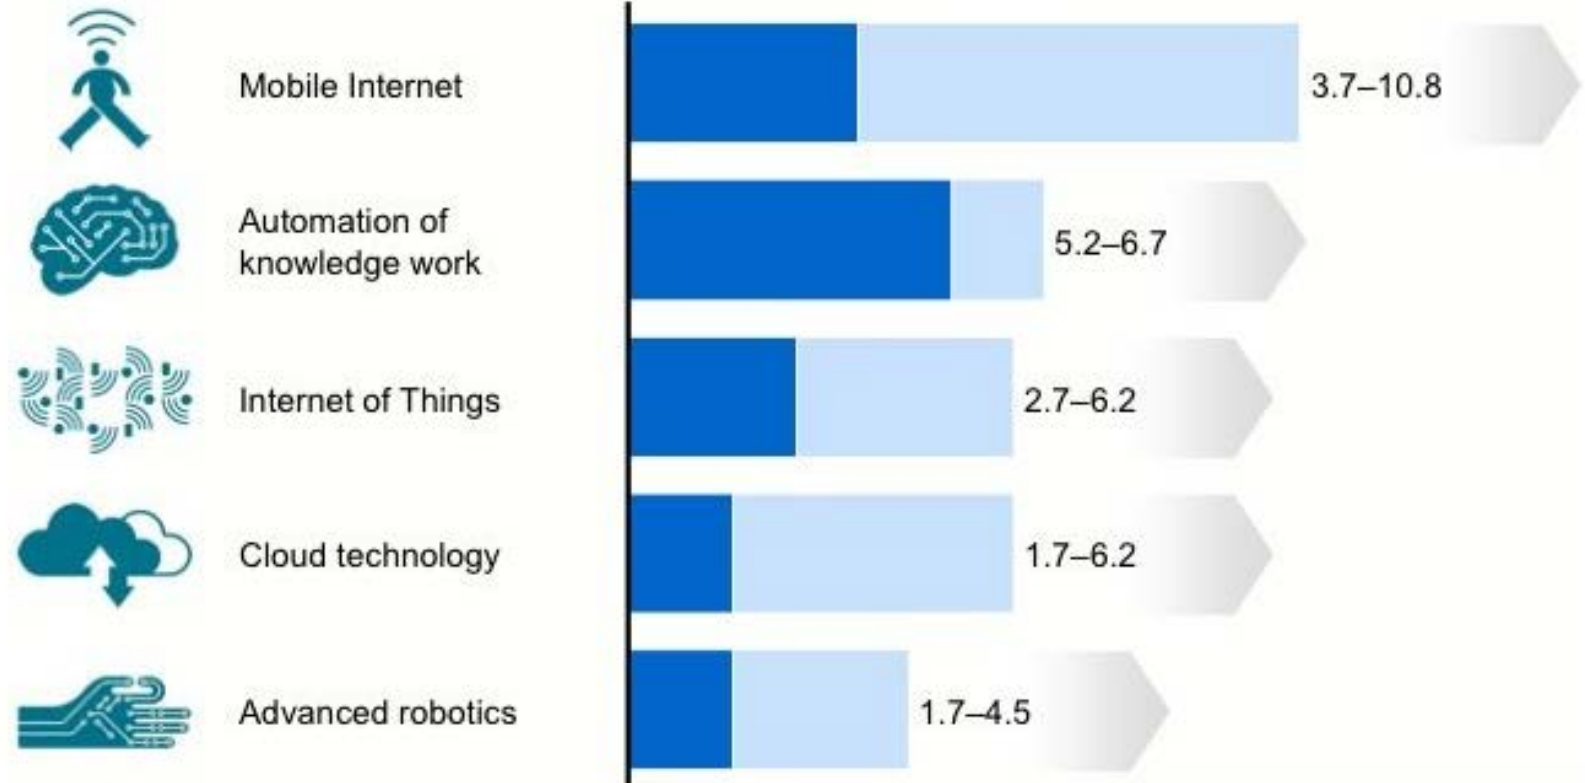

- A **multidisciplinary** center for **collaborative** research
- **55** faculty, **20** tech staff and **200+** students from 15 departments resident in the building (Eng., Science, Ag, Pharmacy, Vet Med,...)

Deloitte (Dec. 2015)

**25 billion
connected
devices (enabled
by IoT) will be in
use by 2025**

McKensie (2014)

➤ 1600's Mechanics

- Analytical equations: $F(x)=m d^2x/dt^2$

➤ 1900's Quantum Mechanics/ Relativity

➤ 1950's Computers

- Solve equations numerically

➤ 2000's Machine Learning

- Neural networks

1920's

**It is the theory
which decides what
can be observed.**

Disruptive and wasteful

Transportation Energy 1978-2008:

1978 *Synfuels (oil shale, coal)*

1988 *Methanol*

1993 *Electricity (BEV)*

2003 *Hydrogen (fuel cells)*

2006 *Ethanol (Biofuels)*

2008 *Plug in hybrid*

Global Megatrends (Discovery Park 2015)

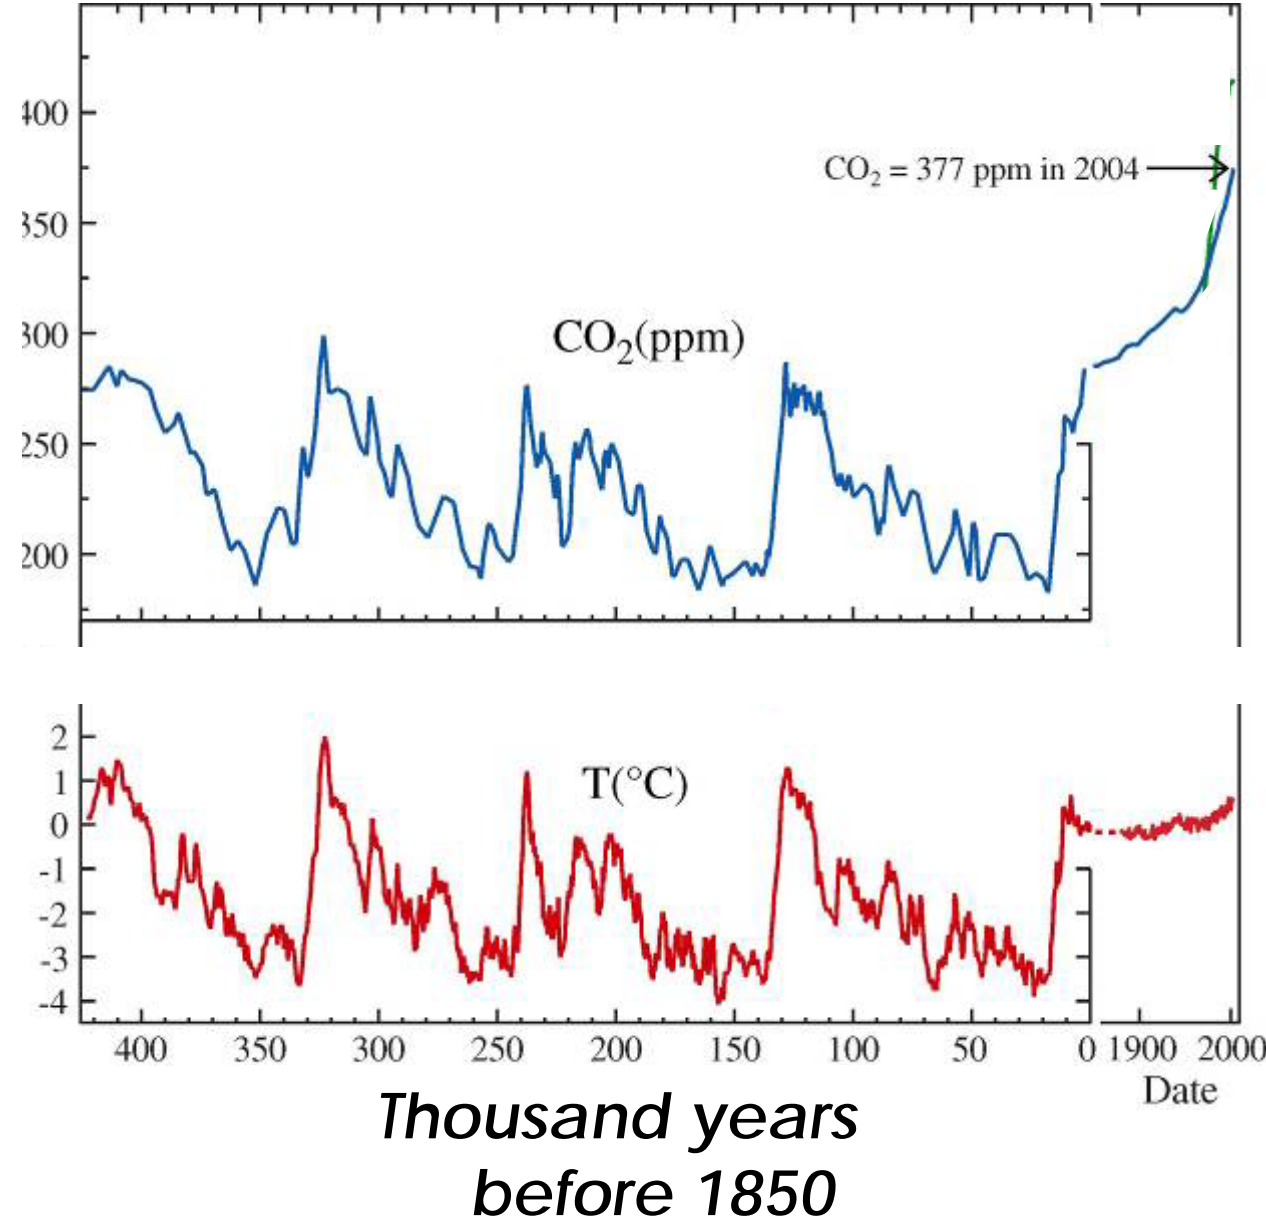

Climate Change? Global Warming?

400,000 years of
greenhouse-gas &
temperature history
based on bubbles
trapped in Antarctic ice

Last time $\text{CO}_2 > 300$ ppm
was 25 million years ago.

Change*, 68, 269, 2005.

John P. Holdren, 2006

The Politically Incorrect Guide™ to **GLOBAL WARMING** and Environmentalism

A part of the bestselling P. I. G. series

You've heard plenty about "global warming." But did you know:

- ☀ The Earth has often been hotter than it is now
- ☀ Only a tiny portion of greenhouse gases are man-made
- ☀ Most of Antarctica is getting colder
- ☀ The media only recently abandoned the "global cooling" scare
- ☀ "Global warming" hasn't made hurricanes worse

Christopher C. Horner Senior Fellow at the Competitive Enterprise Institute

Limits to Growth (Club of Rome)

Estimated lifetimes^a of selected resources at current world use rate

Resource	Meadows et al., ^b 1972		MMSD ^c , 2002 USGS, 2005 ^d
	(Static)	(Exponential)	(Static)
Aluminum	100	31	202 ^c , 16 ^d
Chrome	420	95	48 ^d
Cobalt	110	60	149 ^d
Copper	36	21	28 ^c , 32 ^d
Iron	240	93	132 ^c , 64 ^d
Lead	26	21	21 ^{c,d}
Mercury	13	13	69 ^d
Nickel	150	53	41 ^c , 44 ^d
Tin	17	15	37 ^c , 24 ^d
Tungsten	40	28	48 ^d
Zinc	23	18	25 ^c , 24 ^d

Future Smart Cities

*Trend
toward
mega-cities*

Many SMART city initiatives in early 2000's aimed to mitigate deep problems in big cities! Solutions that only work when density of population is high.

- Mid 2010's: Can we use IoT /connected communities to benefit from economy of scale without concentration/ traffic/ pollution?***

SMART Community in Discovery Park District

*400+ acre development
over 10 years,
\$1B+ investment,
90,000 residents*

The Wabash Heartland Innovation Network

\$38.9M, 2018-2022

**Create a living
laboratory (community
IoT testbed) in 10
counties:**

- **Population ~
400,000**
- **4000 farms**
- **>250 small and
medium
manufacturers**

There is no limit to what can be accomplished if it doesn't matter who gets the credit.

*Ralph
Waldo
Emerson*

A human being experiences himself separated from the rest — a kind of optical delusion of his consciousness.

This delusion is a kind of prison for us, restricting us to our personal desires and to affection for a few persons nearest to us.

Our task must be to free ourselves from this prison by widening our circle of compassion to embrace all living creatures and the whole of nature in its beauty.

1950's

Background Slides

- Justification for a university:
preserve the connection between knowledge and the zest of life, by uniting the young and the old in the imaginative consideration of learning.
- ... *This atmosphere of excitement, arising from imaginative consideration, transforms knowledge.*
